

BREECH BABY

There is only one reason for a breech baby. In Chinese medicine this has been known for thousands of years. The answer is mostly emotional, with some added postural issues.

Working too late into the pregnancy, emotional stress, moving house, loss of a family member, arguments or physical fright all lead to this syndrome. The old saying of the world turned upside down in one's life applies directly to this syndrome. What is manifested in mental becomes physical. Every person that has ever walked through the clinic door with this syndrome has an emotional and postural cause behind their having a breech baby. The most common reasons are moving, renovating, working past 30 weeks, sitting at computers or a desk at work (postural), or emotional stress.

The remedy is simple really. Slow the hell down and stop stressing. Remove yourself from any stressful situation. If renovating, get a motel room for some peace and quiet. Acupuncture and moxibustion is the most effective treatment for this (85% success). Also acupuncture can make ECV more effective if it is needed. A point on the little toe, called Bladder 67 is the main point used to turn the baby. The point is warmed with a herb (Moxa). There are other points added but that depends on the individual. This method has been used successfully for thousands of years. Modern research shows that this method is the safest and most successful method to turn a breech baby.

Bladder 67 (Zhiyin-UB67) is needed and warmed with moxa to help turn breech presentation.

Other points on the body are selected and combined with Bladder 67 to enhance results.
